### Abstract

The article analyzes the problems of the development of the folk tradition in gender education, in the national legislation of universally recognized international norms on the elimination of all forms of discrimination of women's rights, monitoring the implementation in practice of the norms of international documents on gender equality, to which the Republic of Uzbekistan is attached and the implementation of the recommendations established therein.

**Keywords:** gender education, gender competence, components and criteria of gender competence.

The 21st century has radically changed many stereotypes of society's gender roles. The most important events of these changes were the revision of the place and role of women in various spheres of social activity, a new approach to the assessment of harmony in the interaction of the sexes.

The purpose of the strategy for 2017-2021 is to radically increase the effectiveness of the reforms, create conditions for comprehensive and rapid development of the state and society, modernize the country and liberalize all spheres of life.

As stated in the document, a comprehensive analysis of the past stage of independent development by Uzbekistan, as well as the development and implementation of "fundamentally new ideas and principles for the more stable and rapid development of the country" due to the changing world economy in the context of globalization requires [1].

The action strategy is implemented in five stages, each of which envisages the approval of a separate State program to be implemented annually in accordance with the announced name of the year. Development of education, culture, science, literature, art and sports, implementation of target programs for improvement of state policy on youth and development of social sphere aimed at consistent increase of employment [2].

Many researchers emphasize the growing importance of women in public administration, science, medicine, culture and art education, for example, E.V. Kochkina and V.A. Tishkov. Together with T. Egamberdiyeva and N. Egamberdiyeva, we agree that the female part of the population has become the most important component of labor resources, and women make up 40 to 50% of the economically active population of developed countries.

Pedagogical aspects of gender relations in various spheres of activity also emerged from the periphery of research, forming a new scientific discussion that felt the need for a unique psychological and pedagogical conceptual-category apparatus, anthropology, pedagogy, psychology, ethics, medicine,

biology and other disciplines, and for a long time has followed the approach. in the study of personality, it refers primarily to a man. Nowadays, life itself forces us to change this approach, paying more attention to the social interaction of the sexes in various fields.

In the conditions of drastic changes in the classification of gender roles in society, the gender factor is an integral part of almost any research in social sciences and humanities, emphasizing it as objective and scientific. Man and woman are the two main types of human beings, and the relationship between them should be considered as the main model of human relations.

The category "gender" (from English, gender, gender) reflects the characteristics of interaction between men and women as socially organized groups, as opposed to biological (determined) factors of socialization. The object of gender studies is the whole range of social interactions between the sexes based on the gender stratification of society. Nowadays, the term "gender" is often used instead of the term "gender". There is no clear distinction between the situations in which a particular concept should be applied. The use of one term instead of another depends on the views of a particular author.

Authors who have nothing to do with feminist theorists and are not followers of their ideas often use the term "gender" as a synonym for "gender". If the author of a scientific article simply does not see any difference, he simply does not separate and separate them.

At the same time, feminists and followers of their movement have a clear position. The term "sex" is rarely used by them, and then only used to denigrate it. Often they use the specific "sex" or "gender sign" because they declare the freedom of self-determination of a person regardless of his biological characteristics.

According to the press service of the upper house of the parliament, the Republic of Uzbekistan At the 20th plenary session of the Senate of the Oliy Majlis, the president suggested the establishment of a new structure in the Senate - the Committee for Women and Gender Equality, and implementation of extremely important and urgent tasks.

The decision of the Senate Council of the Oliy Majlis "On improving the activities of the Senate of the Oliy Majlis of the Republic of Uzbekistan in the field of comprehensive support for women and ensuring gender equality" was adopted. According to the decree, the committee of the Oliy Majlis Senate on women and gender equality issues was established.

As noted, the main tasks of the committee are to develop recommendations for the implementation of the state policy aimed at ensuring gender equality in the country and the active participation of women in public and public affairs, laws on gender equality issues and the development of the family institution. review taking into account compliance with its goals and objectives. presentation of reform country and international law and related conclusions.

Development of proposals for the implementation of nationally recognized international norms in the national legislation on the elimination of all forms of discrimination of women's rights to the committee, the international convention on gender equality, of which the Republic of Uzbekistan is a member control of the actual implementation of the norms of the documents and implementation of the recommendations specified in them.

"In its activities, the committee will conduct direct dialogue with the population, including women, and take measures to solve the identified urgent problems through parliamentary control, to study the actual situation of gender problems in the field. is paying special attention," the report said. In addition, the members of the committee consider the appeals of individuals and legal entities regarding women, gender equality and the institution of the family by preparing proposals for the improvement of reproductive health, motherhood and childhood protection.
