### Annotation:

This article describes in detail the importance of using new pedagogical technologies in teaching English, the fact that some teachers do not know how to use and do not use technologies during English classes, and the most effective ways to teach and learn a foreign language using modern technologies.

**Keywords:** english language, pedagogical technologies, foreign language modern technologies, multimedia.

### Introduction

Nowadays, the importance of learning English in Uzbekistan is much higher than before. A number of English language experts are implementing new methods and ways of learning English. This will definitely increase the effectiveness of teaching foreign languages. Teaching using technology has several unique advantages. In addition, it greatly increases the efficiency of the teaching system and, in turn, helps the language learner to keep up with the times and move forward.

### Literature analysis and methodology

Technology is gradually replacing traditional teaching. Today, a number of new programs and shows that help to teach English are regularly broadcasted on television programs. It should also be noted that today new methods of using modern innovative technologies have been introduced in Uzbekistan to increase the effectiveness of teaching.

For example, a student who is being taught a foreign language on the basis of multimedia has the opportunity to develop four skills and learn both by seeing and listening through interesting materials. In addition, the student can guess the meaning of some words by watching live actions and tries to understand it. Of course, the use of modern technologies of computer, radio, CD, DVD in any foreign language classes will further advance the educational process and allow the young generation to learn foreign languages faster.

### Results:

The fact that some teachers do not know how to apply and do not use technologies during the English language classes leads to some boredom of the students. It is for this reason, that is, in order not to extinguish the enthusiasm of the learner, the use of technologies and at least the computer during the lesson ensures that the learner's interest increases.

Because, educational materials prepared according to the learner's age, interest, ability, mastery of lessons will definitely be effective. On the contrary, if we teachers do not choose educational materials based on these requirements, if we broadcast video films, songs or texts containing complex words to

elementary school students or show them through multimedia and computers, then When we show educational materials consisting of very simple texts to the students of rta and higher classes or groups, the students' interest in learning the language gradually fades and they do not master the lessons. This, in turn, can lead to a decrease in grades, a loss of respect for the teacher in front of the students.

## **Discussion:**

Teaching and learning a foreign language using modern technologies is one of the most fruitful ways. In this process, among other things: - when using computers, the student can watch and listen to foreign language videos, demonstrations, dialogues, movies or cartoons; - it is possible to listen and watch foreign language radio broadcasts and television programs; - use of tape recorders and cassettes, which are considered a more traditional method; - CD players can be used. The use of these technical tools makes the process of learning a foreign language more interesting and effective for students.

## **Conclusion:**

In conclusion, today, teaching through interactive games is becoming a tradition in schools. It is known that the lesson is conducted on the basis of various games, which ensures that students demonstrate their capabilities, concentrate, improve their knowledge and skills, and become stronger. The basis of the use of game technology is the activity that activates and accelerates the student.
