Keywords:

education system, science, development, education, teacher.

It is clear to all of us that the cornerstone of development and the force that makes the country powerful and the nation great is science, education and upbringing. Our tomorrow, the bright future of our country, is closely related to the education system and the education we provide to our children.

Sh. MIRZIYOEV

Today, by the President of the Republic of Uzbekistan, increasing the employment of young people and women, providing them with a source of income, modern occupations, vocational guidance in general secondary educational institutions further placement of work and a new professional education system strategy, main priority tasks were determined. The essence of the new strategy of the system is professional education that every young person, every person who studies in his institutions, finds his place in life, first of all, he should earn his own income, thereby serving the economic growth ensuring the well-being of his life with his work, and ultimately society should contribute to its development.

A new, continuous format of professional education is the skilled middle link

human resources in our society while training specialists plays an important role in development. In this sense, the new professional education system in Uzbekistan is a country to every sector of the economy, every link of society, every family, every is a major socio-economic and political event affecting the life of a citizen. The professional education system is the most in the world according to the form and principles of teaching based on the successful educational programs of developed countries is being organized.

Quality of education based on international experience in professional education providing entrepreneurial skills and personal competences in young people priority is given to formation, special emphasis on practice, orientation to income takes place. For this, new standards, a new teaching methodology, a new textbook and literature, modern innovative educational technologies and assessment system is introduced. In the process of transformation of the educational system, professional education a qualified middle link based on the requirements of the labor market for lateral development increases the possibility of training specialists. This process is the state and society in accordance

with their interests, the rights of individuals to receive education is also distinguished by provision.

Quality education improves people's living conditions and is sustainable creates a foundation for development. Convenience and quality of education issues to the strategic development programs of all countries of the world included because education for the self-realization opportunities of the state population material well-being and socio-economic in the country by creating an environment contributes to ensuring stability, increasing human capital, in its place, increases the economic potential of the country and in the international arena creates a competitive advantage.

Eradicating illiteracy and all great in providing affordable education for citizens successful Uzbekistan education advantage of state funding which is undoubtedly a positive factor. Types of education in the Republic of Uzbekistan are as follows:

- preschool education and upbringing;
- general secondary and secondary special education;
- professional education;
- higher education;
- post-higher education;
- retraining of personnel and improvement of their qualifications;
- extracurricular education¹

In October 2019, the concept of developing the higher education system of the Republic of Uzbekistan until 2030 was adopted in our country. This document was based on tasks such as the development of integration of science, education and production in order to accelerate intellectual development, train competitive personnel, effectively organize scientific and innovative activities, and strengthen international cooperation. The content of the concept reflects the priorities of the reform of the higher education system of our

country. In it, expansion of the level of coverage and improvement of the quality of education in higher educational institutions, introduction of digital technologies and educational platforms, involvement of young people in scientific activities, formation of innovative structures, commercialization of scientific research results, international recognition and many other specific directions are defined. All this serves to raise the educational process to a new level of quality²

Today, the world's most prestigious higher education institutions are the giants of science It is no secret that the furnaces are considered. New higher education now countries, branches of the world's leading universities are being established. An example for, in the last 5 years, 47 new higher education institutions in our country, among others, branches of foreign universities are established, higher educational institutions the number reached 125.

Recognizing the priority of education in our country, systematic and wide-ranging measures are being implemented to ensure the quality and freedom of education and to create an effective system of state administration in this area. In the last five years, about 100 decrees and decisions of the President of the Republic of Uzbekistan and more than 220 decisions of the Cabinet of Ministers of the Republic of Uzbekistan were adopted in the field of education. Every year, a large part of the state budget of the Republic of Uzbekistan is allocated for social expenses, including education expenses. 26.4 trillion from the state budget to finance the costs of maintaining kindergartens, schools, higher and secondary special educational institutions in the 9th month of 2022. more than soums were allocated. result, a number of reforms were implemented in the field of education³

The Republic of Uzbekistan is actively studying the experience of other countries to improve the efficiency of higher education, including the competitiveness of individual universities operating in the educational services market. First of all, the Concept for the development of higher education for the period up to 2030 was adopted, the contours of infrastructure development and specific tasks were defined. Particular attention is paid to the development and implementation of alternative types and forms of education.

To conclude, the current situation in the field of education is promising tasks in other fields with its relevance and practical importance they will never fail the reforms. Because the reforms in this area are more extensive continuation in scope is the demand of the times. In the 21st century, which is called the age of information technology, everything is important in the fields of industry, construction, chemistry, agriculture, textiles, to bring about high progress in engineering and other fields development of science, creation of innovations in this regard has become a vital necessity. This process is now in all developed countries in the

world being recognized. Special attention is paid to this process in our republic is being given.
