Foundation of the Third Renaissance

Nazokat Kurbanova

The teacher at Muhammad Yusuf Creative School under the Presidential Educational Institutions Agency

ABSTRACT

Ravshanbek Kasim ugli, a talented poet who lives in Shahrikhan district, author of apologues on current issues of our time, is such a representative of our nation. Teacher's family goes back to Burkhaniddin Eshon (Eshon- owner of dedication) who was one of the Sayids. This article are about this poet.

Keywords:

New Renaissance, natural changes, new outlook, wake up, Jadids, perfection, wisdom, purity, honesty, great goal, owner of dedication .

"We are on our own country way the foundations of the Third Renaissance set a great goal to achieve. We should create environment and condition for new Khorezmids, Berunis, Ibn Sinas, Ulugbeks, Navoi and Baburs."

Sh.M. Mirziyoyev

As our country is on the verge of a new renaissance, it is important that we put our heads together. Because it is natural that changes such as a new outlook, a new way of thinking, and a new way of living are taking place in the consciousness of a certain nation, and this is not a task that is carried out as a result of the wishes and actions of a minority. They are the leaders of every nation's culture and spirituality, who fought tirelessly to awaken and develop the religious and secular consciousness of their people, and they occupy a worthy place in the history of those nations. The development of science and culture is inconceivable without them. Devotees such as these dedicated their lives to issues of national development, and started reforms by

correcting the shortcomings of the nation's representatives. As an example of this, we can show our enlightened ancestors who selflessly lived for the freedom of the nation in the last century. They really tried to wake up the people and did not say "ouch" if their lives were lost in this way. For example, the following poetic passage taken from the work of Abdulla Qadiri is an example of our opinion.

If it turns out to be good for the nation,
We consider this as an opportunity
and shoot together like a storm.

Come, young people, intellectuals, be
enthusiastic this day

We will wake up those who are
sleeping if we can.

The Jadids, who managed to wake up the people, first of all dreamed of the freedom of the nation, the need for the representatives of every nation to be intellectuals, to abandon useless habits and develop fully mature individuals like our great ancestors. It seems that the roots of the current Renaissance date back to 100 years ago. Unfortunately, as mentioned in the above poem, the freedom of philanthropic people was completely limited. It is gratifying that in our time, worthy descendants of people-loving people who experienced such humiliations of the colonial rule are living and working. The followers of such ancestors are living among our people and spreading their light for the benefit of the nation. Ravshanbek Kasim ugli, a talented poet who lives in Shahrikhan district, author of apologues on current issues of our time, is such a representative of our nation. Teacher's family goes back to Burkhaniddin Eshon (Eshon- owner of dedication) who was one of the Sayids. According to the book "The Key of Perfection" authored by candidate of philosophy Z. Ishakova, Burkhaniddin Eshon was one of the famous Murids of Khoja Ahmed Vali. Khoja Ahmad Vali's father Muhammad Vali was one of the leaders of the Naqshbandi order. This is one of the reasons that shows that there are opportunities for us to achieve great changes and development results in the current period. When we read the secrets of Ravshanbek Kasim ugli, a bright representative of this holy generation, who drank water from the fountain of knowledge of those whose names are written in golden letters in our history, we can see that all the topics that invite people to goodness are covered in it, the language is fluent and the same for everyone. We will witness that it is understandable. The author is able to make a real turn in Uzbek literature with his stories, which include the tasks to be performed in order to strengthen the independence of the Motherland and the peace of the country. Saints consider kings to be the shadow of God on earth. This tradition continues in the works of Ravshanbek Kasim ugli, a descendant of Eshons.

If the country is strong and powerful,
Obedience to the leader is perfect,

The country lives peacefully without any explosions.

There is no peace in the place where there are quarrels.

Let those who have a mind see some countries,

The black earth is swallowing young babies.

Through such comparisons, the teacher teaches the people about solidarity and gratitude. Through these wisdoms, it has been mentioned in many places about the noblest deeds among people.

If you benefit people,

Your salvation in the world is inevitable.

I am the God, who says that I am in need,

We always do well to the needy.

Many people dwell on incurable diseases and prove with vital evidence that if the almighty God wills, a person can overcome his shortcomings, he can be cured by a miracle.

On the one hand, it shows the way of salvation to a hopeless person, and on the other hand, it helps people to understand that they are always in the eyes of the Truth. This, in turn, helps to prevent evils such as bribery, theft, extortion, and hypocrisy that occur in our social life.

When medicine can't do anything

Human worships the creator.

Asks for his wish

Asking for salvation.

It wouldn't have happened like that,

if there had been gratitude,

Thankful for everything he has.

It seems that the works of the teacher Ravshanbek Kasim ugli, are a guide for people to live correctly and productively in life, and will help to lay the foundations of the Third Renaissance, which is emphasized by our President. The fact that our ancestors, who caused the emergence of the previous Renaissance periods in our country and surprised everyone in the field of world science, lived with sacred knowledge of concepts such as purity and honesty, can be a sufficient proof of our thoughts.
